HOSPITAL EMERCENCY ROOM DASHBOARD

KEY TAKEAWAYS

DESCRIPTIVE ANALYSIS

(APRIL 2023 - OCTOBER 2024)

The emergency room dataset, covering the period from April 2023 to October 2024 (a total of 19 months), records a total of 9,216 unique patients.

Patient Wait time & satisfaction

Patients at the emergency room experience an average wait time of **35.3** minutes, exceeding the hospital's targeted minimum of **30** minutes, while the average satisfaction score remains low at **4.99** out of **10**, highlighting a clear need for improvements in both wait times and patient satisfaction.

Departmental Referrals

The majority, totaling **5,400** patients, had no referrals. Among those referred, the largest group was directed to general practice (**1,840** patients), followed by orthopedics (**995** patients). Other notable referrals include cardiology (**248** patients), physiotherapy (**276** patients), neurology (**193** patients), gastroenterology (**178** patients), and renal (**86** patients).

Peak busy Periods

Mondays (1,377 patients), **Saturdays** (1,322 patients), and **Tuesdays** (1,318patients) are the busiest days, with peak hours at **7 AM**, **11 AM**, **1 PM**, and **11 PM**, requiring active staffing to manage patient flow effectively.

Patient Demographics

Adults aged **30-39** form the largest group with **1,200** patients, closely followed by young adults aged **20-29** with **1,188** patients, while age groups **50-59, 60-69, and 70-79** each account for around **1,150** patients.

Race Distribution

The race distribution of patients shows that **White** individuals constitute the largest group **(4,612)**, followed by **African American (1,951)**, **Multiracial (1,557)**, and **Asian patients (1,060)**, with **1,030** patients not declaring their race.

Admission Patterns / Statuses

Nearly half of the patients were **admitted (4612** patients) which corresponds to **49.16 %** of our total patients while the rest (**4604**) corresponding to **50.84 %** were **treated** and **discharged**.

Summary

The dataset highlights high patient volumes, moderate satisfaction scores slightly below average, and frequent referrals to general practice and orthopedics. Mondays and late-night to early-morning hours are particularly busy periods. Patient demographics reflect a diverse range of ages and races, with nearly equal proportions of admitted and non-admitted patients. These insights underscore opportunities to optimize resource allocation and enhance patient care in the emergency room
